

**Table A-29. Total, Federal, company and other funds for industrial energy R&D performance in the U.S. and number of companies that performed energy R&D in the U.S., by primary energy source: 2001 and projected 2002**

Primary energy source	Number of companies <sup>2</sup>	2001 <sup>1</sup>			Projected 2002		
		Total	Federal	Company	Total	Federal	Company
		[In millions of dollars]			[In millions of dollars]		
Total	52	1,381	78	1,302	1,370	103	1,268
Fossil fuels	25	771	44	726	783	33	750
Nuclear	5	(D)	(D)	23	(D)	0	(D)
Total geothermal, solar, and conservation and utilization	19	254	18	236	(D)	(D)	230
All other energy	25	(D)	(D)	212	173	(D)	(D)

<sup>1</sup> Beginning with 2001, statistics for total and Federally funded industrial R&D exclude data for Federally Funded Research and Development Centers (FFRDCs)

<sup>2</sup> Detail does not add to total because categories are not mutually exclusive.

KEY: (D) = Data have been withheld to avoid disclosing operations of individual companies.

NOTES: Energy R&D data are collected only on Form RD-1, the survey form sent to larger R&D-performing companies. Consequently, the universe of companies that performs energy R&D may not be represented by the statistics in this table.

The company R&D in this table is the industrial R&D performed within company facilities funded from all sources except the Federal Government. The funds predominantly are the company's own, but also include funds from outside organizations such as other companies, research institutions, universities and colleges, nonprofit organizations, and State governments. Excluded from this table are company-funded R&D not performed within the company (e.g., R&D contracted out to other organizations) and company-funded R&D not performed within the 50 U.S. states or D.C. (e.g., R&D not performed on U.S. soil by foreign subsidiaries or other foreign organizations).
